

SKAO Memo Series (Demo)

Test memo: flux calibration stability

Version 1

Belen Placeholder (Example Observatory)

Abstract

This is a fictitious memo used to test the SKAO Memo Series demo workflow. It contains no real data, results or observatory information.

1. Purpose

The document exists only to check that the publication workflow uploads the files placed in the publish/ folder to Zenodo Sandbox and copies them to the public memos repository.

The DOI will be printed here once the memo template is in place.
